AMBER RESIDENCE HOTEL,
(16 Esugbaghi Street, GRA, Ikeja, Lagos)
IKEJA, LAGOS, NIGERIA

For registration, please visit: www.aspaed.org
or send an email to: aspae2019@yahoo.com
CALL FOR ABSTRACTS

ABSTRACT GUIDELINES

ASPAC 2019 welcomes the submission of abstracts for original contribution to the field. All abstracts submitted will go through a blind, peer-review process carried out by an international review panel. Each abstract will be reviewed by at least two reviewers and the final selection of abstracts will be reviewed by members of the Abstract Review Committee.

GUIDELINES

1. The deadline for abstract submission is midnight West Africa Time (WAT) on February 2nd, 2019. Abstracts will not be accepted after this date.
2. All abstracts must be written in English.
3. All abstracts must be submitted to aspae2019@yahoo.com
4. The text should not exceed 2500 characters including spaces. One table or figure can be inserted allowing 500 characters per table/figure.

The text of the abstract should briefly state:
1. Objectives: Indicate the purpose of the research/review article/case series or the hypothesis that was tested.
2. Methods: Include the setting for the study, the subjects, the diagnosis or intervention, and the type of statistical analysis. If references are needed, they should be provided in the text.
3. Results: Present as clearly as possible the outcome of the research/review article/case series/ research and after significance if appropriate.
4. Conclusions: Briefly discuss the data and emphasize the significance of the results. All abstracts should disclose primary findings and avoid, whenever possible, promissory statements such as “experiments are in progress” or “results will be discussed”.

ABSTRACT CATEGORIES

The abstract categories with the general headings under which abstracts will be submitted and reviewed include:

1. Diabetes
2. Growth Disorders
3. Puberty Disorders
4. Thyroid Disorders
5. Adrenal Disorders
6. Calcium and Bone metabolism
7. Disorders of Sex Development
8. HIV and endocrinopathies
9. Obesity
10. Syndromes
11. Endocrinopathies of post cancer survivors
12. Pituitary Disorders
13. Other endocrine disorders
14. Metabolic disorders

NOTIFICATION OF ACCEPTANCE OR REJECTION

Notification of acceptance or rejection will be sent to the corresponding author by the end of February 22nd 2019. Please note that only the corresponding author will receive this email concerning the abstract and is responsible for informing all co-authors of the status of the abstract.

Authors whose abstracts have been accepted will receive instructions for the presentation of their abstract.

WELCOME ADDRESS

WELCOME TO LAGOS, NIGERIA

Dear colleagues and friends,

On behalf of the African Society of Paediatric and Adolescent Endocrinology (ASPAE), we are delighted to invite you to attend the 10th ASPAE Annual General Scientific Conference and Meeting in Lagos, Nigeria holding from 13th - 15th of March, 2019 at Amber Residence Hotel, Ikeja GRA, Lagos.

Paediatric Endocrinology and diabetes have come of age in Africa witnessing a tremendous growth in clinical skills capacity and research, leading to increasing diagnosis of children and adolescent research with diabetes, endocrine and metabolic disorder. Clinical entities that were previously thought to be uncommon are now known to exist and are being managed by trained paediatricians. Despite the challenges in the laboratory, drugs and sometimes logistics support, the increasing number of practising paediatric endocrinologists, networking and research across the continent has led to the recognition of this sub-specialty as a must have in the health system. PETCNA Nairobi and PETCWA Lagos created an opportunity for a relationship with ESPE, ISPAD, WDF and LFAC that led to this remarkable phenomenal growth and impact of the Society on the continent.

Lagos, Nigeria is a coastal city situated in the West African region of Africa. It is the second largest city in Africa, the economic capital of Nigeria and is highly cosmopolitan. It is the most populous city in Nigeria and the African continent. Lagos is easily accessible by air, sea and road from within and outside the country. Lagos has several tourist attractions and fantastic nightlife. The weather in March is humid and rainy season will be starting with occasional rainfall. From Lagos, other cities with rich traditions are accessible. One of such is Abeokuta, an ancient city situated in Ogun State. It has within its border the Olumo Rock with its cavernous caves that housed the citizen at the time of the attack in the olden days. This ensured the city was never conquered. It also has the famous tie and dye (Adire) industry. A visit to the city which may be the highpoint for those who want to feel the mixture of urban/rural setting is promised to be an unforgettable experience.

Come and discover the exciting cosmopolitan megacity of Lagos. We welcome all delegates coming from different parts of Africa and the world at large with background as doctors, nurses, pharmacists, nutritionist/dietician, social workers and more. Our goal is that all children and adolescents with diabetes, endocrine and metabolic disorders should have the optimal care and life.
